

Homework 7 (20 points)

Due Wednesday 4/20 by 9:20AM

In the course repo there is the file **Exam3Practice.pdf**. I also pushed a Word (.docx) version of the file **Exam3Practice.docx**.

1. In preparation for Exam 3 on Friday April 22, edit the Word version and turn in typed up solutions to the Exam 3 study guide.
2. Push the file **Exam3Practice.docx** to your github repo by the start of class Wednesday 4/20 at 9:20AM. This due date is firm. **No late submissions will be allowed** as I am going to release my solutions guide immediately after that.
3. You have my permission to work on these as a group, but under no circumstances should you turn in work that you did not actively participate in doing.
4. Some solutions, like a circuit diagram or logic equation might be better done as handwritten. Just take a photo of your answer and insert it into the Word doc. Do not submit separate files.
5. For questions that require code, do not turn in handwritten code.
6. I am not going to grade this in detail but I am going to check it as completed and as "Sloppy", "OK", "Excellent", on a 0, 10, 15, 20 point scale.
